E-portfolio

EDUCATION

Cornell University, College of Engineering | Ithaca, NY Expected May 2030
Intending to major in Electrical and Computer Engineering | Meinig Family Cornell National Scholar

Round Rock High School | Round Rock, TX Class of 2026
Selected high school coursework: Multivariable Calculus, AP Physics C, AP Computer Science A, Digital Electronics, Engineering Design and Development, Aerospace Engineering

TECHNICAL EXPERIENCE

3DBuildz LLC | Founder and Designer Founded Jun 2025

- Launched a custom 3D printing business providing rapid prototypes for local companies and custom consumer parts; secured 3 business projects and 12 individual orders in the first week.
- Generated over $680 in monthly revenue through custom design and fabrication services.

NASA Moonshot | Program Participant May - Jun 2025

- Designed and 3D modeled gloves, helmets, and an arm-mounted heads-up display for lunar and Martian spacesuit proposals; researched reduced-gravity heat transfer to inform temperature regulation.

NASA High School Aerospace Scholars | Program Participant Oct 2024 - Apr 2025

- Developed mission concepts and spacecraft CAD models in Fusion 360 and Tinkercad for weekly Mars colonization challenges; collaborated in teams of 4-5 on solution design and 3D modeling.

CareSet | Coding Intern Jan - Jul 2023

- Analyzed healthcare datasets with a three-student team to map patient traffic between providers in Dallas and Austin; researched early-stage AI coding applications.

ENGINEERING PROJECTS AND LEADERSHIP

Future City | Co-founder and 3D Modeling Mentor Established Sep 2024

- Led a four-student team in designing a sustainable ocean city; earned People's Choice and Best Essay awards at the international competition.
- Mentored 40+ students in 3D modeling and helped establish six middle school teams.

3D Printing and CAD Club | Member and Mentor High school

- Designed and printed replacement parts and device holders for Special Education classrooms, saving the school $200-$300 monthly; taught Autodesk Inventor to 100 engineering students.

Rocket Science Club | President and Former Secretary High school

- Designed and launched SNARKY, a model rocket that reached over 400 meters; developed and taught rocketry and flight-path lessons for 30+ students.

COMMUNITY LEADERSHIP

African Library Project | Co-founder Founded May 2019

- Collected 22,000+ books and raised $11,000 to establish 19 libraries across six countries; earned the President's Volunteer Service Award Gold for approximately 270 service hours in 2024.

TECHNICAL SKILLS

Design and fabrication: Autodesk Inventor, Fusion 360, Tinkercad, FDM and SLA 3D printing
Additional: Data analysis, website design and management; CAD Inventor 3D modeling certification
